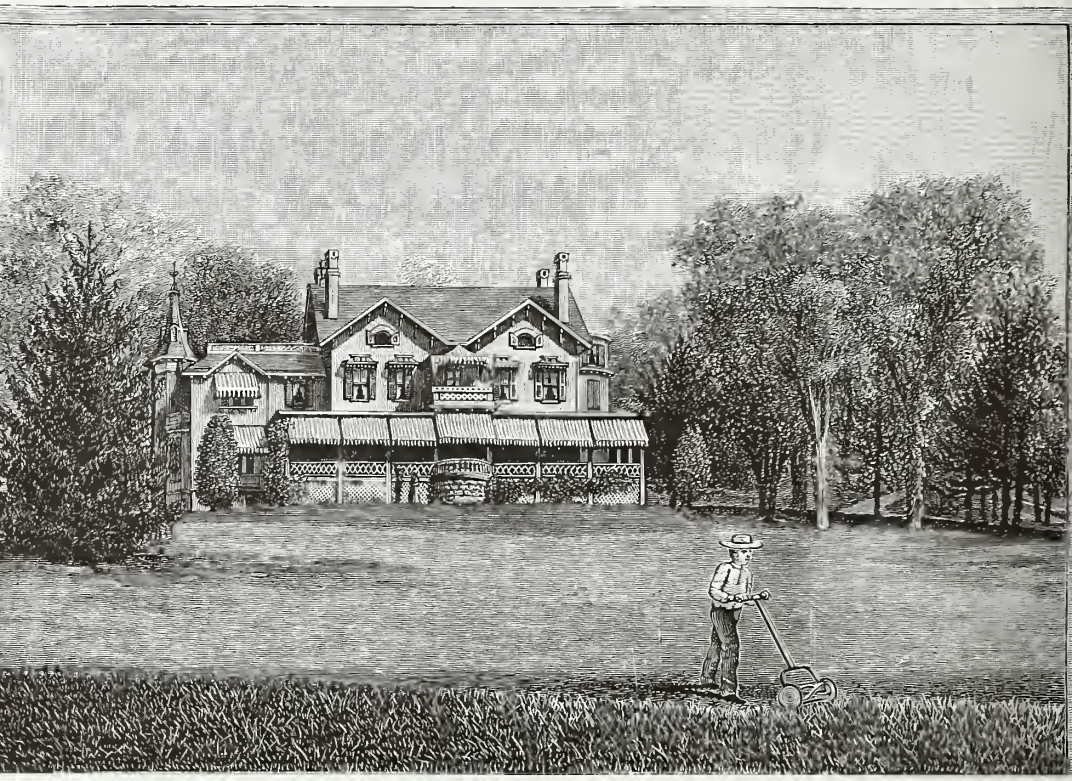
CONDITION OF SALES.

THAT IT IS DISTINCTLY UNDERSTOOD THAT WE DO NOT WARRANT OUR SEEDS OR HOLD OURSELVES RESPONSIBLE FOR ANY LOSS OR DAMAGE WHICH MAY ARISE FROM THE FAILURE THEREOF

A.H. Kellogg Stationer 100 Reade St. N.Y.

OUR EMERALD LAWN GRASS SEED



Is composed exclusively of the very best varieties of Grass, such as long experience has shown to be best adapted to produce a thick, heavy, carpet-like lawn. In this mixture we use only the very best re-cleaned seed, and we can guarantee that, for purity and germination, it is equal to any variety sold under any name. One of the greatest troubles in obtaining a good lawn is to get it free from weeds. These, while not always in the seed, but quite often in the ground, or come from the use of stable manure, are, nevertheless, always objectionable. Our customers can rely, in buying the Emerald Lawn Grass Seed, of its being the very purest seed obtainable, and entirely free from any weeds or foreign seed.

EXCELSIOR LAWN DRESSING.

In connection with our Lawn Grass Seed, we offer as the most desirable fertilizer for both new lawns and those which only need enriching, the **EXCELSIOR LAWN DRESSING**; it is put up in bags of 5, 10, 25, 50 and 100 lbs., at the following prices: 5 lb. bags, 25 cts.; 10 lbs., 45 cts.; 25 lbs., $1.00; 50 lbs. and over, at 3½ cts. per lb. Special prices in quantities of 500 lbs. and over.

PAYMENT JUNE 1st, AFTER DATE.

Delivery f. o. b. New York City.

NOTICE.

[COPYRIGHTED, 1887, BY THE A. B. CLEVELAND CO., LIMITED.]

THE TRUE EARLY SNOWBALL CAULIFLOWER.

We have obtained from the grower of what has heretofore been known as Henderson's Early Snowball Cauliflower a large stock of this, the best Early Cauliflower yet known, its merits, having been so fully described, advertised and proved, need no repetition at our hands; suffice it to say that it will, under proper conditions, produce 98 per cent. of solid, pure, white heads, in open ground, and it is the earliest variety in cultivation. It is equally if not more valuable for forcing, from its close, compact habit and its shortness of outer leaves. We can *guarantee* this stock as being perfectly true and identical with that of the introducers of this invaluable variety, and are enabled, owing to the last bountiful crop, to offer it at much lower figures, the price bringing it within the reach of everyone who grows this delightful and profitable vegetable.

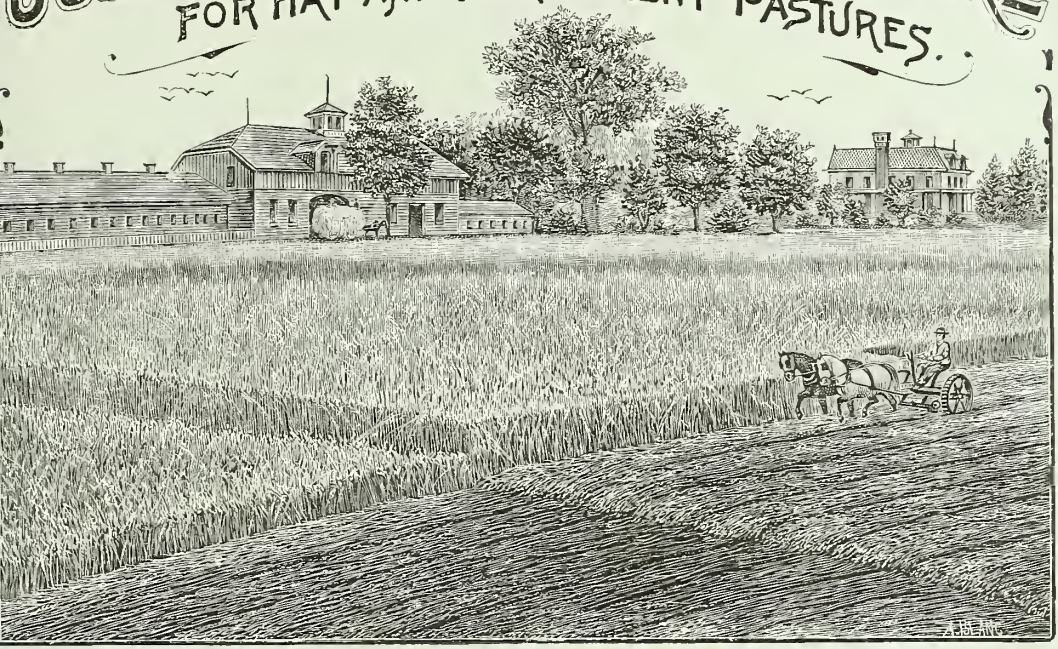
OUR SPECIAL GRASS MIXTURE

FOR HAY AND PERMANENT PASTURES.



[COPYRIGHTED, 1887, BY THE A. B. CLEVELAND CO., LIMITED.]

CAN BE SOWN IN EITHER SPRING OR FALL.

Our **SPECIAL GRASS MIXTURE** for hay and permanent pasture, consisting of the following and other varieties: **Orchard Grass, Meadow Foxtail, Sheep Fescue, Rhode Island and Creeping Bent, Hard Fescue, Sweet Scented Vernal** (True Perennial), **Meadow Fescue, English Rye Grass, Italian Rye Grass** and **Red Top,** as highly recommended by that eminent authority, Mr. Wm. Crozier, of Long Island, who has made the matter a life study, mixed in the proper proportions, we will supply for $2.25 per bushel (of about 15 lbs.) On rich land 2 bushels of this mixture is sufficient to seed an acre, but where the soil is poor, more seed will be required. A fair average would be 2 to 4 bushels to the acre. The foundation of this mixture is Orchard Grass, and the addition of the several other Grasses named add to its value. Orchard Grass, when sown alone, has a tendency to form tussocks or clumps, which, however, can be overcome by thick seeding; the other Grasses being sown with it fill up the vacant spaces between the Orchard Grass. In addition to this, the other Grasses comprised in this mixture are specially suited for cattle and sheep, and by them eagerly sought for, and have special value in pasture lands for different animals. To this mixture, intended for either Mowing Lands or Pasture (but which, on account of its greater weight, should be sown separately), is to be added about ten lbs. of Mammoth or Pea Vine Clover, which is worth 12 cts. per lb., and is put in a separate package when shipping.

Special price given for quantities of ten bushels and upwards.

SPECIAL MANURE FOR GRASS LANDS.

A very convenient manure to have for general use on farm lands, or where stable manure is not readily attainable. Use 3 to 5 bbls. per acre, and if at time of proposed sowing, harrow it in; it can be used, however, with great advantage as a top covering. Price, per bbl. (about 250 lbs.), $7.00; per ton, shipped, $50.00.

Guaranteed Analysis.—Ammonia, 4 to 5 per cent.; Phosphoric Acid, total, 10 to 12 per cent.; Potash as Sulphate and Muriate, 3 to 4 per cent.
